

## Appendices

### Appendix 1. Reports overview of TotalEnergies and Equinor from 2001 to 2022.

COMPANY	TYPE OF REPORT	YEARS	CONTENT
<b>Equinor</b>	Sustainability report	2001-2021	From the 1 <sup>st</sup> year of publication of the sustainability report and through the 20 following years, Equinor focuses these publications on sustainability, climate change and energy transition. The firm presents its goals and values. It also goes deeper into challenges it is facing, opportunities, areas of focus, actions, investments, projects, etc.
	Annual reports	2001-2021	Equinor published each year a statutory report according to Norwegian regulations. The report presents consolidated financial statements, the board of directors' report, the corporate governance, the group's policy of remuneration for leading employees, payments to governments, and a deep dive into each business unit with a strategic report on them. Overall, it's a business overview of the performance, the finances, the main issues and risks, the opportunities, new developments, and areas of focus.
	Capital market update	2008-2021	Each February, Equinor is presenting to its investors where its ambitions, its performances, its strengths, and its strategies.
	Climate roadmap	2017 & 2018	They detailed their strategy "to create a low carbon advantage" by explaining their main goals, how they target to achieve them (reductions targets and projects) and what has already been done.
	Business update	2020	This presentation provides an overview of the business performance for the year and last quarter, the corporate strategy of the company, its portfolio, its new projects, the challenges that occurred in 2020, and a

			focus on energy transition. It occurs after the arrival of the new CEO in November 2020 Anders Opedal.
	Corporate presentation	2021	Equinor is presenting why and how it is positioning itself as the “leading company in the energy transition” and goes here into the details on its goal of “transforming into a broad and global energy company”. They are presenting the main reasons why they are transitioning: creating value, new industry opportunities, innovation to maintain competitiveness, and margin pressures.
	Energy transition plan	2022	This presentation goes through the Energy Transition Plan set by Equinor to meet a net-zero future by 2050. The goal is to convince the shareholders that the company has “the right strategy, ambition level, capabilities and track record to be a leading company in the energy transition while ensuring long-term shareholder value creation and competitiveness”.
	Overview of climate ambitions	2021 & 2022	Overview of all the emissions reduction targets established by the firm in a table detailed as the following: ambition year for the goal, what is the ambition, boundary of the goal, which scope of emissions is concerned, and the baseline year of comparison.
<b>TotalEnergies</b>	Sustainability reports	2012-2021	TotalEnergies focuses these publications on sustainability, climate change and energy transition. The firm presents its goals and values. It also goes deeper into challenges it is facing, opportunities, areas of focus, actions, investments, projects, etc.
	Annual reports	2005-2021	TotalEnergies published each year a statutory report according to EU regulations. The report presents consolidated financial statements, the performance of the group, corporate

		governance, a risk & control report, and a presentation of the main strategies.	
	Factbooks	2006-2021	This report presents the corporate strategy of the group, the highlights of the year (achievements and new projects), a financial highlight and statement, and a deep dive into each business unit (strategies, activities, opportunities, challenges).
	“Results and Outlooks” presentations	2009-2021	This presentation for investors is displaying the results of the year with the challenges that the firm met, the new projects that they did, the different areas of focus, and the activities undertaken. It’s also providing an overview of the strategy for the coming year.
	“Investors’ day” presentations	2013-2021	Each September, TotalEnergies is having a day of presentation to its investors where it is presenting the ambitions, the performance, the strengths, and the strategies of the company.
	CSR forum	2013	This presentation shed light on Corporate Social Responsibility in TotalEnergies: how they apply it, what it means for the firm, and what are the ambitions and main actions.
	Becoming a world leader in renewables	2020	TotalEnergies is going into the details of its ambition to be a worldwide leader in renewables: what are the opportunities for growth, how it is a promising area for value creation, where they want to develop and why.
	Climate roadmap in action	2021	This presentation goes deeper into the strategy of TotalEnergies for tackling climate change, presenting the areas of focus.
	Sustainability Climate progress report	2022	This report “aims to be a benchmark for endorsement of the United Nations’ Sustainable Development Goals” by going into the details of the 4 following dimensions: Climate and sustainable

			energy, People's well-being, Care for the environment and Creating shared value.
	<a href="https://totalenergies.com/energy-is-reinventing-itself/">https://totalenergies.com/energy-is-reinventing-itself/</a>	n.d.	<p>In 2021, Total changed its name to TotalEnergies with this vision behind it: "Energy is reinventing itself, Total is becoming TotalEnergies." Here the group is explaining the strategy behind its new name: "There are 7 colours, for as many energies. We go from one colour to another, from historic colour, is the starting point for this transformation." (oil, natural gas, electricity, hydrogen, biomass, wind, solar)."</p>
